

# **Class III, Biological Safety Cabinets**

### **Cabinet Filtration System**

Dynamic air barrier, inflow and forward-directed downflow air converge

ESCO

- Ambient air is pulled into the cabinet through a disposable pre-filter, trapping larger particles and prolonging the life of main filter. Air is then passed through the downflow ULPA filter into the work zone, bathing the work surface in clean
- Near the work surface, the downflow air stream splits and exits the chamber through perforations around the perimeter of the work zone.
- Air from work zone passes through the first ULPA exhaust filter below the work surface, before traveling through internal ducting and exhausting to the laboratory environment after passing through the second ULPA exhaust filter located above the cabinet's main chamber.

Airstream

- ULPA-filtered air
- Unfiltered / potentially contaminated air
- Room air / inflow air

## **Sentinel™ Silver Microprocessor Controller**

- Supervises all cabinet functions
- Easy-to-use soft keys for menu, blower, light, UV, electrical outlet, etc
- Large display which monitors the operational parameters

### Magnehelic\* pressure gauge

Mounted in the rear of the work zone for at-a-glance monitoring of work zone negative pressure

\*Registered trademark of Dwyer Instruments, Inc.

#### **Pass Box**

Equipped with interlocking doors that permits materials transfer without risk of environmental contamination

## **Glove ports**

For easy and safe glove changing

Available in 1.2, 1.5, and 1.8 meter models

## **Neoprene™ Synthetic Arm-length Gauntlets**

 Single piece, leak-tested assembly guarantees maximum protection and flame and abrasion resistant

- To find out your glove size, measure (in inches) around your hand with a tape measure at the place indicated on the diagram. This measurement, in inches, is the closest to your glove size, i.e. 8" is equal to a glove size of 8.
- You should use your dominant hand, the right if you are righthanded, and the left if you are left-handed.
- Standard glove sizes available are 8 (standard size) and 9. Specify when ordering.

	Biosafety Cabinets	For Air Quality	For Filtration	For Electrical Safety
Standards Compliance	EN 12469, Europe	ISO 14644.1 Class 3, Worldwide IEST-G-CC 1001, USA IEST-G-CC 1002, USA	IEST-RP-CC034.1, Worldwide IEST-RP-CC007.1, Worldwide IEST-RP-CC001.3, Worldwide EN 1822 (H14). Europe	IEC 61010-1, Worldwide EN 61010-1, Europe UL 61010-1, USA CAN/CSA-22.2. No. 61010-1

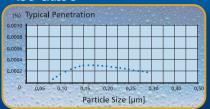

## **Air-tight Built**

 Completely welded construction to ensure absolute containment for operator and environmental safety

#### **Dual Exhaust ULPA FILTER**

- 10x Filtration efficiency of HEPA filter
- Creates ISO Class 3 work zone instead of industry-standard ISO Class 5

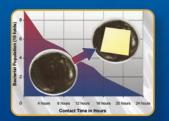

## **Angled Front**

To optimize user comfort, reduce glare and maximize reach into the work area

#### **ISOCIDE™** Powder Coat

- Silver-ion impregnated powder coat
- Inhibit microbial growth to improve safety

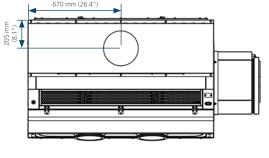

#### General Specifications, Airstream Class III, Biological Safety Cabinets
