

Liquid Nitrogen Biological Container

Introduction

Liquid nitrogen (LN₂) is known to provide a stable ultra-low temperature environment ideal for long-term sample storage. It is also commonly used in cryogenics for chilling and freezing applications.

Esco Lifesciences proudly introduces the Liquid Nitrogen Biological Container (LBC) Series. These containers are suitable for long-term storage and transportation of samples in liquid nitrogen for various applications.

Features:

- Lightweight and durable aluminum construction
- Standard lid lock to guarantee safety of samples
- Has multilayer insulation and vacuum to reduce thermal radiation
- Available in various volume capacities
